

A PARTNERSHIP TO SUPPORT HEMP AND U.S. VETERANS

HOW FARMING HEMP SUSTAINS OUR WORLD

LEVERAGING U.S. VETERAN EXPERTISE

The Collaborating Partners are all Veteran-Owned and Operated and focus on Veteran Recruiting

Leveraging veteran workforce capabilities accomplishes many goals:

- Providing a reliable workforce for key positions.
- Increases available occupational training for Veterans.
- Increases job opportunities to Veterans and their families.

HEMP IN OUR WORLD

Sit for a moment and look around you. The walls. The ceiling tiles. The carpet beneath your feet. The clothes on your back. The food containers on your table. The car outside. Now grasp this truth: 90% of what you see is toxic to your body and to the earth. Plastics, synthetics, petroleum products—each one leaching micro-particles into the soil, the air, and into us. These toxins wear down the human body, attacking the immune system, overwhelming the endocannabinoid system, and fueling cancer rates that rise with every generation.

Now imagine the opposite. Imagine a world where 90% of what you see is made from hemp. Imagine a world where hemp is no longer a sidelined crop but the beating heart of a new American economy. A world where doing the right thing for the planet is also the righteous thing for people, communities, and industry.
